

A little green. A little curiosity.

Binimage is buffer's personal site for AI, hardware and hands-on ideas. The green interface pairs calm surfaces with precise lime accents.

Color has a job.

Use soft green for larger panels. Reserve vivid lime for small highlights. Keep reading links dark green on light pages, and pale green on dark pages. Pair light green panels with dark text and the black wordmark.

Editorial illustrations may retain blue. Avoid solid blue interface panels, buttons and cards.

Binmage.

Stay curious.
Make it tangible.

AI / HARDWARE / IDEAS

A detail worth noticing ↗

Preserve the wordmark

Use the original Urbanist outlines and natural proportions. The compact B. is for browser tabs, bookmarks and small brand placements.

Let the content breathe

Keep the shared type hierarchy and generous white space across English, Chinese and Spanish. Body text and interactive controls must remain readable in both light and dark modes.

Use the current files

The kit includes editable SVGs, PNG exports, the green icon, social layouts, a business card layout, an ambient background and the Urbanist font with its license. This is a web color update; earlier application mockups remain historical material.
